# SAFALYA PARIDA

## SOFTWARE ENGINEER

### CARRIER OBJECTIVE

I am searching for career opportunities to join a company that can aid in improving my skills, enhancing my knowledge, and unlocking my full potential. I am open to exploring a diverse range of roles that will provide me with a broader perspective.

### EDUCATIONS

#### GITA Autonomous College, Bhubaneswar

B.Tech

November 2020 - August 2024

#### Sidheswar high school, Panasuapada

10th

Year of Completion: April 2018

#### Tetrahedron Higher Secondary School, Tangi

12th

Year of Completion: March 2020

### PROJECTS

#### AI CHATBOT

The AI chat bot project can be utilized as a security solution for organizations. The software has the capability to detect faces and store them, which can be useful for marking attendance automatically. This feature can enhance the security measures in place within the organization. Note that this information was last updated in 2020.

#### LIBRARY MANAGEMENT SYSTEM

The library management system incorporates a security feature that utilizes facial recognition technology to enhance organizational security. The software captures and stores images of detected faces, which are then used to automatically mark attendance for library users. This feature was added in the year 2023.
